ACTION IN CASE OF FIRE

on or near our land

1. **Immediately alert Roy Kendall … 083 703 2424**
   or Steve Spottiswoode … 082 558 3158
   to take control of communications with beneficiaries and our neighbours

   - Jacques Cilliers (eastern boundary) **… 083 296 6954**
   - Jacobus Swanepoel (western boundary) **… 083 256 6856**
   - Ronald Herridge (northern boundary) **… 072 128 2405**
   - Daan Meyer (RGKB fire representative) **… 082 703 8253**

If there is a delay in reaching Roy or Steve, alert the neighbours yourself. Give them our gate code in case they want to back-burn onto our land and/or use our water.

They have been requested not to put out fires on our land *and informed that our beneficiaries and employees have been* ***instructed not to participate in firefighting****. Clarify these points if necessary.*

2. **Park the Hamerkop cars in the middle of the concrete apron.**
3. **Fill the water tank in case neighbours want to use it.**
4. **Keep your phone on you and alert all others on the property to do the same.**
5. **Stay in the house if the smoke starts to get unpleasant. The slab is also a fire-safe place to observe and report on the fire.**

There is no need to panic or evacuate the property. ***Do not fight the fire***
– it is not necessary or desirable and our insurance will not cover you for injuries.

Take the time to read the full fire management policy on our notice board

Dealing with wildfire is complex because we need our land to burn at least every 3 to 5 years
- to avoid a build-up of dangerous flammable material
- to maintain our biodiversity as a conservancy.

However, our neighbours outside the Magaliesberg Protected Environment (MPE), especially farmers, are trying to keep fire out. The firebreaks along our boundaries aim to protect them from fire moving from our land onto theirs. They are invited to backburn onto our land if they feel a need for extra protection.
